DETAILED ACTION

The following action is in response to the amendment filed for application 10/721,309 on July 19, 2004.

Allowable Subject Matter

Claims 1-6, 9-17, 21-29, 32-38, 40-42, and 44-47 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the transfer case as claimed, and particularly including a first ring having a first slot and a second ring having a second slot that is alignable with said first slot to define an actuation chamber having laterally-spaced first and second stop surfaces; a mode actuator moveable in a first position to engage said first stop surface to permit rotation of the second ring relative to the first ring, operable in a second position to be displaced from engagement with both said stop surfaces to permit rotation of the second ring relative to the first ring in both directions; operable in a third position to engage both stop surfaces to prevent rotation of the second ring relative to the first ring in both directions, and including the remaining structures of claims 1, 14, 25, 36, and 46, respectively. The present invention also particularly includes said mode actuator being an actuator rod with three segments, said third segment adapted to engaged both said stop surfaces, and including the remaining structures of claims 36 and 41, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
